

ABSTRACT HAND DRAWING

Kindergarten-5th Grade

For this project you will trace your hand several times, overlapping your hands.

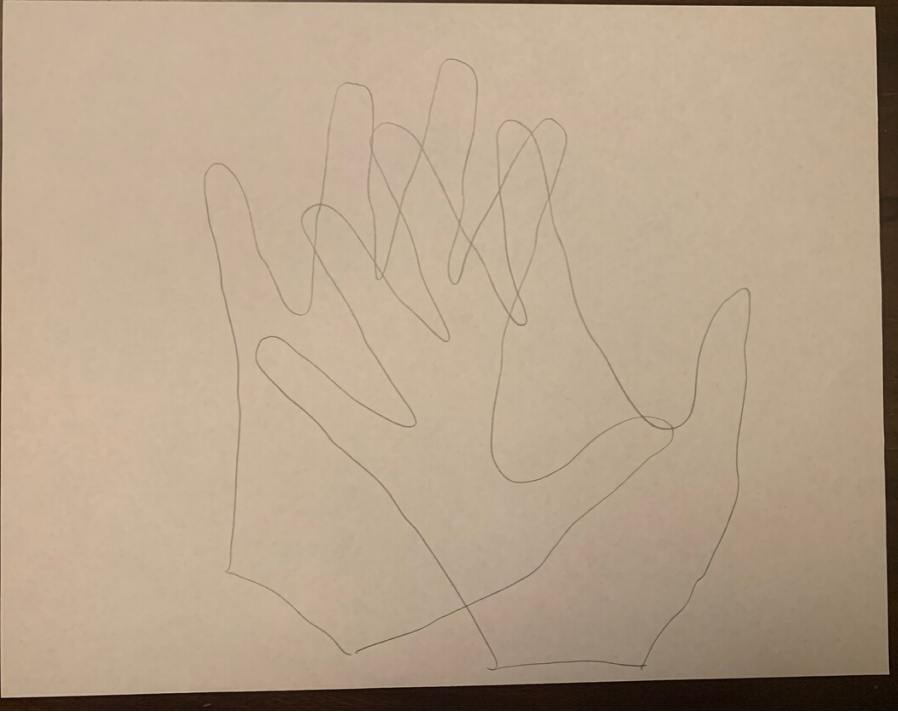

Once you've traced your hand 3 to 5 times on your sheet of paper, create a design in the different shapes that are made where the hands overlap. You can use solid colors or patterns. Create a different design in the spaces where your hands **do not** overlap.

You can use markers, colored pencils or crayons.

Take a look at my example below to see how I created my abstract hand drawing.

Please email student projects to Lcohn@shlenker.org

**Example of overlapping
hands.**

**Example of final
project.**

Close up of hands.
